

ASBA Lamb Morbidity/Mortality Reporting Form

The American Southdown Sheep Breeders' Association Board of Directors is looking at morbidity/mortality in Southdown lambs due to unknown causes. Reports of Hairy Lambs in Southdowns are at the forefront of this effort, however, this form can be used to report other issues not yet identified as a concern. To assist with determining the level of occurrence the Board is asking ASBA members to voluntarily report suspect morbidity/mortality occurrences in lambs in their flocks. Completed copies of this form should be sent to the ASBA office. Individual information will be kept confidential. As a whole the information will be used to determine level of occurrence and contributing circumstances, and will be reported to the membership.

Date_____

Lamb Sex_____

Birth type S____ Twin____ Triplet____ Quad_____

Lamb was born Dead_____ Died shortly after birth_____

Still alive_____

Sire Tag #_____ Sire Registration #_____

Dam Tag #_____ Dam Registration #_____ Age of Dam_____

Diagnosis made by Veterinarian _____ Diagnostic Lab _____ Other_____

Diagnosis:

(Please attach copies of any paperwork and/or photographs)
